In black, May 20, 1820

In red, January 27, 1823

The red Wimmerby cancel was used October 1822 to March 1824. Six examples are known. This is one of only three that are dated internally.

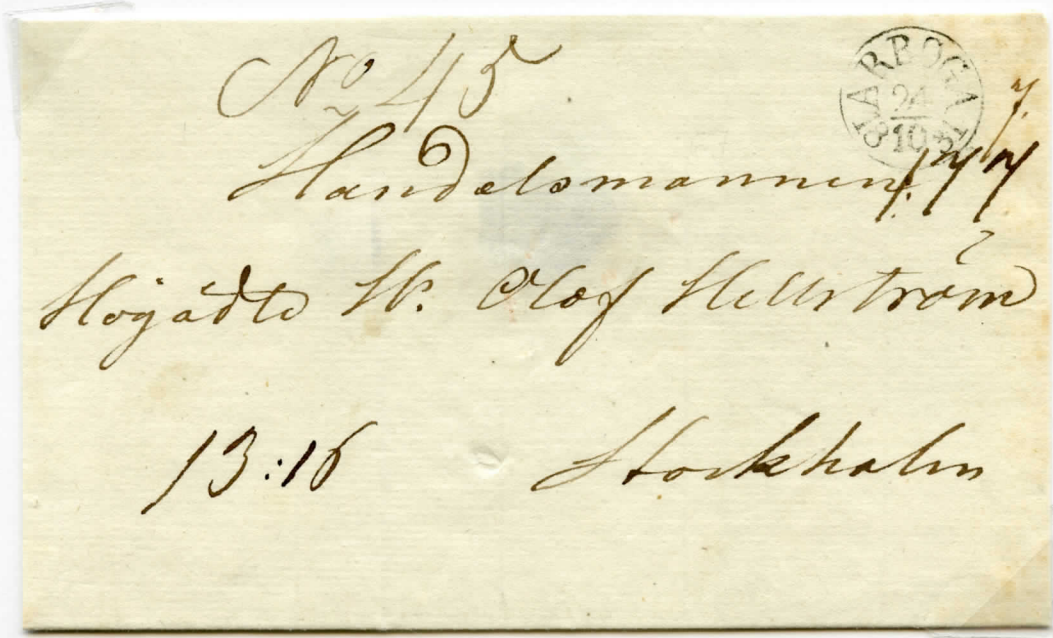

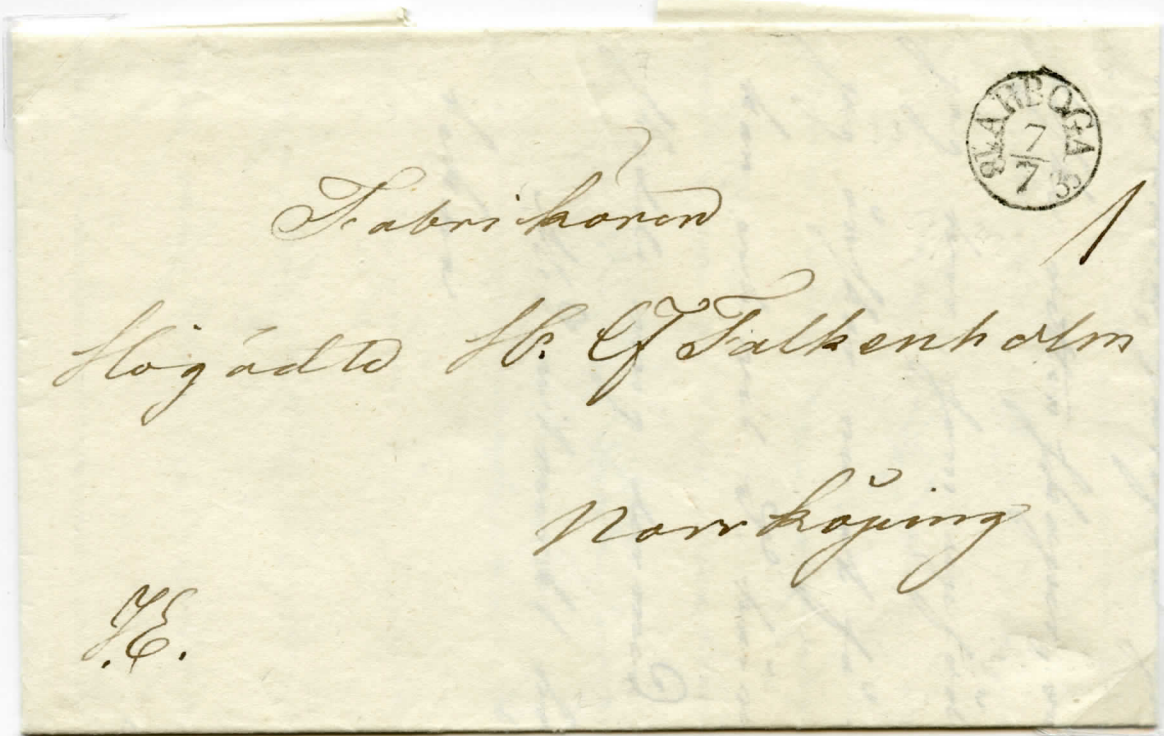

Ystad August 18, 1827

The first dated cancellations of Sweden began to appear in the latter part of 1830. They consisted of a single circle with the town name, the month and day in the lower center, and the year numerals placed in curved format on both sides of the month/day numbers. This distinguishes the cancellation from the later Circle cancelers that had the year date in horizontal format. In some cases the Arc cancels were used as late as 1869. The specific periods of use for each cancel are shown.
